Pork Buying Club

Our pork buying club is perfect for families with small freezers who want to eat local, humanely treated, naturally raised and extremely tasty pork. The buying club splits whole animals so the members get to share in all the best parts of the hog...including the bacon and ham!

Shares are delivered monthly to our Menlo Park drop off point. We ask for a three month commitment every time you renew your membership which equates to three shares. You pay for each share when you pick it up.

There are three levels of membership:

High on the Hog - This membership gets pork chops, ham steaks, bacon, and bulk sausage. Each month's share is at least 14.5 lbs of meat for \$140.00* per share.

Backyard BBQ - This membership gets ribs or shanks (or both), ham steaks, bacon, and bulk sausage. Each month's share is at least 14.5 lbs of meat for \$125.00* per share.

Man's Best Friend - This pet food membership gets bones, butchering scraps, heart, liver, kidneys, tongue, tail, pig ears, pigs feet, windpipe and lungs from pigs and lambs. Everything is raw. No more than 1/3rd of the share will be bones. Organs will be whole or in large chunks. At least 15 lbs of doggie delight every month for \$30 per share.

* During your three month commitment you will get at least 3 lbs of bacon and 9 lbs of ham steaks. We try to evenly distribute these across each month.

How big is a share?

The sample "High on the Hog" share shown above is displayed on a 12" x 16" box top.

What makes our hogs so tasty?

- **The Breed:** Most of the hogs in the buying club will be Tamworth/ Berkshire cross hogs. The rest will be purebred Berkshire hogs. These breeds are considered some of the best meat pigs.
- **The Feed:** All our hogs are fed a natural diet with lots of grains and local hay. They get no antibiotics, no hormones, and no GMOs.
- **The Lifestyle:** We practice and advocate humane livestock treatment in every aspect of our hog's lives.
